👨‍🦰 ChamCongVN

My colleagues and I worked together on a project during the Covid outbreak. My team finished the webclient in less than a month (07-2021 - 08-2021).With abilities already to be had in reactjs so we will analyze and learn mobileclient inside three days, presently mobileclient is not yet complete. We developed a solution specialized in human resource management for companies, into which a face recognition module is integrated to track employee attendance.

We used ReactJS, React Native, JavaScript, C# .NET for RestAPI, Python for face recognition, JWT for Authentication, and Bitbucket to develop the product.
